

Yhonaiker Moncada

Senior Frontend / Software Engineer

Bogota, Colombia | [linkedin.com/in/yhonaiker-moncada](https://www.linkedin.com/in/yhonaiker-moncada) | +57 301 363 6764 | yhonaiker1@gmail.com

PROFESSIONAL SUMMARY

Senior frontend engineer experienced in delivering scalable, performant, and accessible digital products. Skilled in React, TypeScript, Angular, Next.js, React Native, and NestJS integration, with a focus on maintainable architecture, reusable design systems, web performance, and cross-functional delivery.

TECHNICAL SKILLS

Frontend: React, React Native, Next.js, Angular, TypeScript, JavaScript, HTML, CSS, Vite
UI and state: Tailwind CSS, shadcn/ui, Storybook, design tokens, Zustand, Redux, TanStack Query, React Router
Backend and quality: NestJS, REST APIs, unit and integration testing, Core Web Vitals, technical SEO, Coralogix

PROFESSIONAL EXPERIENCE

Witi Senior Software Engineer Bogota, Colombia
Aug 2025 - Present

- Build scalable web applications with React, Vite, TypeScript, Tailwind CSS, Storybook, design tokens, and Zustand using modular, component-driven architecture.
- Improve Core Web Vitals and technical SEO while delivering responsive, accessible, and visually consistent frontend features.
- Contribute to developing and integrating NestJS backend services, including REST APIs, validation, controllers, service layers, and frontend-to-backend communication.
- Partner with product, design, backend, and QA teams to turn business requirements into maintainable technical solutions.
- Use Coralogix to analyze errors, logs, metrics, and user behavior, improving stability and supporting continuous delivery.
- Integrated AI tools into the development workflow to accelerate feature delivery, documentation, code generation, and technical problem-solving.
- Build and document reusable design-system components that improve visual consistency and collaboration across teams.

Bti Lab Frontend Developer Bogota, Colombia
Apr 2023 - Aug 2025

- Built and maintained React Native mobile applications and web applications with React, Next.js, Angular, TypeScript, HTML, and CSS.
- Created accessible, reusable interfaces with shadcn/ui, Storybook, design tokens, forms, validation, and service integration.
- Diagnosed and resolved issues across development, testing, and production environments to improve stability and performance.
- Managed releases to Google Play and the Apple App Store while meeting platform publishing requirements.
- Integrated native libraries and advanced animations with React Native CLI.
- Improved performance through efficient rendering, lazy loading, memoization, Core Web Vitals analysis, and technical SEO.
- Documented reusable design-system components with design and engineering teams to improve scalability, accessibility, and adoption.

Technisupport S.A.S. Frontend Developer Bogota, Colombia
Feb 2022 - Apr 2023

- Partnered with designers and backend engineers to turn visual concepts into interactive, optimized user interfaces.
- Used Next.js, React, React Native, Redux, TanStack Query, and React Router for state, data fetching, and navigation.
- Applied unit and integration testing to improve code quality and application stability.
- Standardized design-system components and patterns to improve consistency and maintainability.
- Maintained clear team communication to identify technical issues and meet project timelines.

CCCS Servicios Logísticos Full-Stack Developer Santiago, Chile
Jul 2021 - Feb 2022

- Built scalable React and Angular interfaces focused on performance, accessibility, and user experience.
- Developed NestJS services, controllers, validation, and endpoints to support system requirements.
- Integrated frontend applications with REST APIs for efficient, maintainable communication with backend services.
- Implemented client-side state and data management with consistent backend synchronization.
- Helped modernize a PHP logistics system with React, Angular, and NestJS, improving shipment management and package tracking.
